EMERGENCY COMMUNICATION UNITS

BONE CONDUCTION NOISE CANCELLING HEADPHONE

H1 Skull Vibrating Communication Device

Tactical Headphones for Bone Conduction Earphones

Description

This device consists of an ear-hook bone conduction headset and a PTT button. It collects and emits sounds by sensing vibrations. It has a noise suppression function in high-noise environments and can make calls clearly in noisy environments. It can quickly replace different walkie-talkie connection cables and adapt to different models of walkie-talkies.

Features

Hearing and listening are integrated, easy to operate.

Waterproof, high temperature resistant, acid and alkali resistant.

Strong noise reduction ability.

It does not affect the use of other protective equipment after wearing it.

Specification

Weight	90g
Pickup	Bone conduction
Pickup Sensitivity	-20.0dB±5dB re. 1V/g (1KHz)
Impedance	1030Ω±15%
Speaker	4Ω/8Ω
Speaker Sensitivity	107±3dB
Speaker Distortion	<5%
Connector	6-pin plug
Operating Temperature /Humidity	-30 ~ 70℃ / 95%RH, 70℃ 500h
Operating Voltage	2.5~10.0 VDC
